

PureGlow

Fire and Fireplace Collection
2025 - 26

Welcome

Welcome to PureGlow, where craftsmanship meets timeless luxury. With over 70 years of expertise, we have perfected the art of creating exquisite fireplaces that embody sophistication, style, and the true essence of home.

Our exclusive collection features premium gas and electric fires, meticulously handcrafted fire surrounds, and complete fireplace solutions designed to elevate your living space. Every piece is crafted with precision, ensuring not only stunning aesthetics but also exceptional performance and durability.

At PureGlow, we believe that a fireplace should be more than just a feature, it should be the heart of your home, radiating warmth and elegance. Whether you are refreshing an existing fireplace or designing something entirely new, our collection offers an array of luxurious solutions tailored to your vision.

Timeless elegance in Aegean Limestone

PureGlow's Aegean Limestone surrounds are a true testament to nature's artistry. Crafted from limestone formed over 50 million years ago and cut directly from the earth, each piece is beautifully distinctive, offering an exquisite blend of history and craftsmanship.

Renowned for its soft, speckled grain and strikingly white appearance, Aegean Limestone complements a variety of interior styles, seamlessly enhancing both modern and traditional settings.

Every mantel is naturally unique, showcasing individual fossil formations, delicate veining, and subtle variations in tone, ensuring that no two surrounds are ever the same. This individuality adds to its character and beauty, making it a stunning and timeless centrepiece for your home.

Himley

Aegean Limestone Surround

Pictured: 58" Himley surround. Also features the Lytton higher performing gas cast insert and 54" black granite hearth, available separately. The Himley is also available as a complete suite, please see page 11 for details.

The distinctive beauty of Portuguese Limestone

Formed over 50 million years ago and cut directly from the earth, Portuguese Limestone is a true embodiment of natural elegance. Its distinctive character is defined by delicate, darker veins set against a lighter backdrop, interwoven with fossilized remnants of ancient plant and animal life, each piece telling a story millions of years in the making.

Renowned for its enduring appeal, limestone fireplaces remain a classic and sophisticated choice for any interior. With a variety of designs available, there is a fire surround to suit every style, whether traditional, modern, or something uniquely your own.

Drayton

Fireplace Suite

Fire Options

Finding the Perfect Fire for Your Home

Whether you're starting fresh with a traditional living space or simply upgrading your fire, our collection offers a diverse range of options to suit your needs. From classic cast iron inserts to an array of gas and electric insets, each design seamlessly blends elegant styling with energy-efficient performance.

Your home's chimney may play a role in determining which fire is best suited for installation. Our collection features solutions for every type of setting, refer to page 59 to find the right fit for your space.

Gas and electric fires offer distinct flame effects and aesthetic appeal. Take a moment to browse the thumbnail images provided here to explore their unique styles before making your selection.

Pictured: 54" Hanley complete fireplace suite in Portuguese Limestone. See page 19 for details.

Cast Inserts

Unmatched Craftsmanship

Our collection features a selection of traditionally styled cast iron inserts meticulously crafted to the highest standards. Intricate detailing and exceptional casting quality define each piece, ensuring a finish that is second to none. Every cast undergoes expert finishing processes, carried out by highly skilled craftspersons to achieve an impeccable result.

In addition, the range includes high-performance gas fires that seamlessly blend traditional insert styling with innovative, patented technology. These design-led fireplaces deliver one of the most authentic flame effects available, combining classic elegance with modern efficiency.

Electric Fires - Warmth & Innovation

Experience the ambiance of a real fire with PureGlow's advanced range of electric fires, designed to bring warmth and style to any space. With realistic flame effects and a variety of designs, finding the perfect electric fire for your home has never been easier. Whether you prefer a classic aesthetic or a sleek, modern finish, there's an option to suit every taste.

Illusion Electric® – A Stunning Open-Fire Effect

The Illusion Electric® embodies the ambiance of the open fire. It's high-definition log, split log and coal fuel beds enhancing the unique full depth flame picture.

Features:

- ECO Design Compliant
- Multi-functional remote control
- High definition log or coal fuel bed
- Dimmable LED flame effect
- Slimline fit 75mm depth
- Electronic room temperature control
- 7 day 24 hour programmable timer
- Adaptive start control
- Open window detection
- Spacing kits Available

Fuel beds options for the Illusion Electric:

Coal

Log

Chelsea 400 Electric – Customisable Flame Technology

The Chelsea 400 combines the latest in multi-colour flame technology with flexible design options. Choose from a range of contemporary and traditional trims and enjoy four interchangeable fuel beds; logs, coals, pebbles, and crystals, to match your evolving style. With PureGlow's electric fires, you can effortlessly enhance the comfort and ambiance of your home, all while enjoying the convenience of cutting-edge technology.

Features:

- ECO Design Compliant
- Infrared remote control with LCD display
- Four interchangeable fuel beds
- RGB colour-changing flame effect and fuel bed
- Thermostatic control
- Adaptive start control & open window detection
- Spacing kits available

Fuel beds included with the Chelsea 400:

Coals

Logs

Pebbles

Crystals

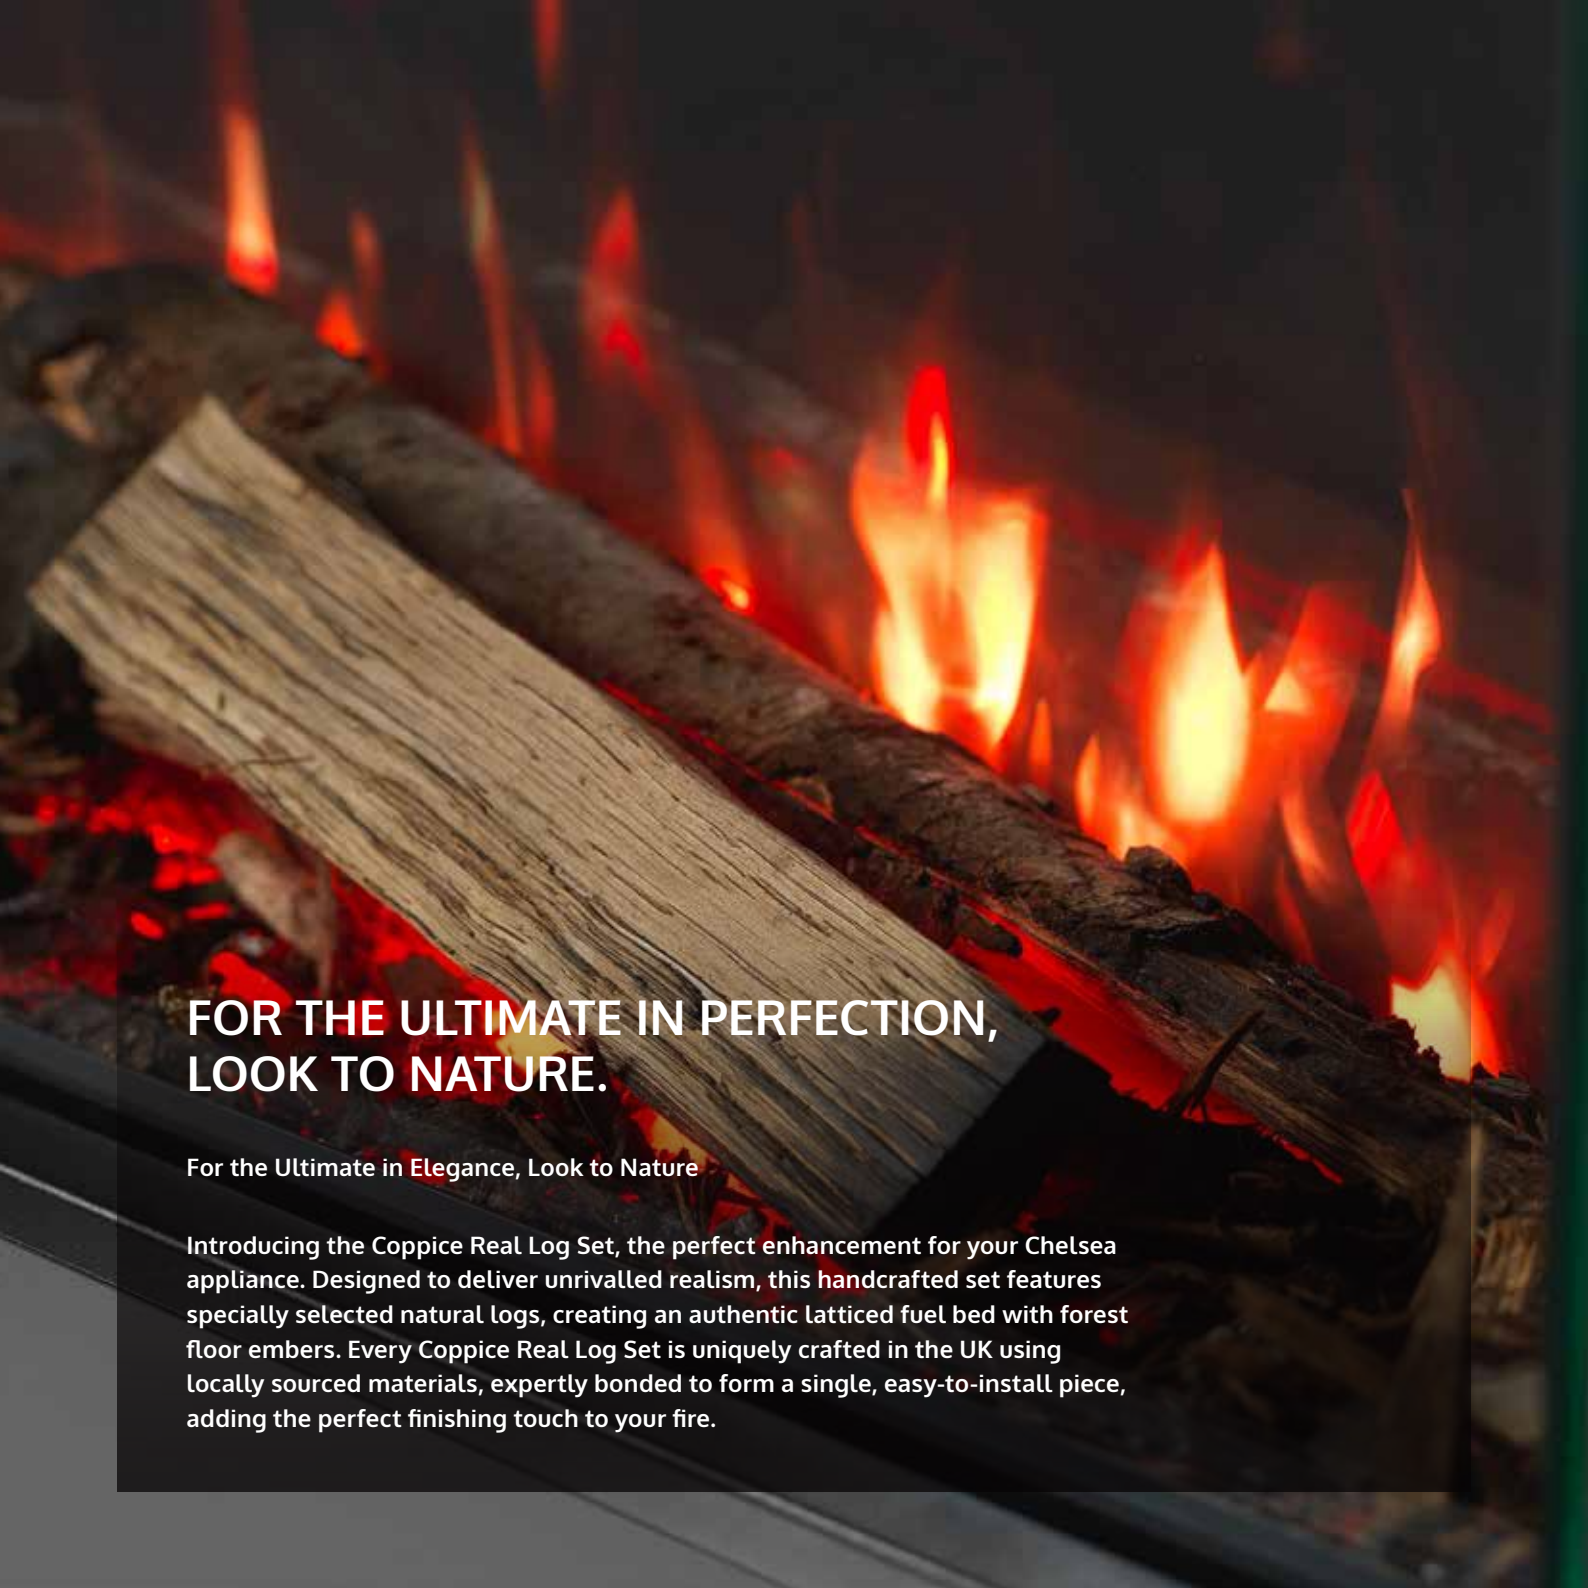

Chelsea 750VS & 1000VS – Luxury & Innovation Combined

The Chelsea 750VS and 1000VS are the ultimate statement in electric fires, perfect for larger rooms or those seeking a striking centrepiece. Using cutting-edge technology, these appliances provide instant heat, realistic flames, and adaptive ambient lighting to transform your living space with warmth and style.

Features:

- Ultra-realistic glowing fuel bed with embers and customisable log layout
- Fully ERP Compliant with Eco Function
- Convenient multiple control options (Manual, Remote Control, or App)
- 7-day programmable timer with adaptive smart heating
- Easy to install
- Wall mountable, supplied with brackets
- Multi-option RGB flame and fuel bed colours with user preset options
- Heat Output 1.8kW with 3 heating modes and cool blow function
- Three independently controlled lighting effects:
 - Flames: Colour & Brightness
 - Under Fuel Bed: Colour & Brightness
 - Above Fuel Bed: Colour & Brightness
- Six pre-set Trilight Themes
- Optimised heater position with minimal visible vents
- Open door/window detection

FOR THE ULTIMATE IN PERFECTION, LOOK TO NATURE.

For the Ultimate in Elegance, Look to Nature

Introducing the Coppice Real Log Set, the perfect enhancement for your Chelsea appliance. Designed to deliver unrivalled realism, this handcrafted set features specially selected natural logs, creating an authentic latticed fuel bed with forest floor embers. Every Coppice Real Log Set is uniquely crafted in the UK using locally sourced materials, expertly bonded to form a single, easy-to-install piece, adding the perfect finishing touch to your fire.

Surround Notes

All dimensions are provided in mm, please note column G is shown in inches, as a guide only and are subject to a tolerance of 12mm. Please note columns I, J and K apply to suites and complete suites only.

Flue Types

The Chimney or flue in your house will normally determine what kind of fire you will choose. Identify which type of chimney you have or whether you have no chimney using the information below.

Class 1

These are commonly found in older houses (pre-1960) and are identifiable by a 7" (180mm) or greater diameter flue. Prior to installation of a new fireplace, an existing flue must be structurally sound and checked for blockages.

Class 2 (Prefabricated)

These are found either in an older house where the existing flue has been lined with a proprietary steel flue or in a newer house with a steel flue built in. Identifiable by a 5" (130mm) or greater diameter flue and a steel flue terminal.

Class 2 (Pre-Cast)

Many newer properties that do not have chimneys are fitted with pre-cast flues made from hollow concrete or clay blocks. These travel vertically up through the cavity wall of the property to a ridge vent or metal flue terminal on the roof.

No chimney

Modern houses often have no chimney, and one option is a balanced flue cast insert which have no requirements for a chimney.

Alternatively you can choose from our wide range of electric appliances which can be located in virtually any room in your home.

Installation

Your PureGlow fireplace is made up of a number of different components and it is important to ensure that your installer has the necessary qualifications and experience to fit ALL the components of a fireplace.

All appliances are supplied with detailed, comprehensive installation and user instructions. All installations must be in accordance with the manufacturer's instructions, current building regulations and subsequent British standards. The installation should only be carried out by a qualified competent person. Failure to comply with these requirements may render the appliance unsafe in the first instance, impede on the efficiency and serviceability of your appliance and ultimately invalidate any warranty.

All installers in order to satisfy the terms and conditions of our warranty must be registered with the appropriate regulating bodies as deemed by PureGlow. All gas installers within the UK must be registered with the Gas Safe Register. In the Republic of Ireland the Board Gais.

It is important that you retain all documentation following the installation as this will be required in order to activate the warranty if needed. The documentation should be supplied by building control following successful registration of each installation by the installer together with any commissioning certificates, benchmarks and service records completed in the rear of the installation manual.

No liability is accepted for problems caused by poor installation or misuse of our products.

All PureGlow products should be fully inspected prior to installation as no responsibility for re-fitting, repairs or redecoration can be accepted if defective products have been installed. If installing a PureGlow surround in conjunction with a fire not manufactured by PureGlow, please refer to the manufacturer for suitability.

General Information

All the images throughout this brochure are for illustrative purposes only and are as accurate as possible. Some natural materials may vary due to the nature of the products, but if the colour you require is critical then please consult your retailer before basing all your decisions on the colours shown here.

Some room sets may appear not to comply with the requirements of the latest building regulations, we would always advise that you check your proposal with your approved fitter before proceeding with any project. There are occasions when designs, or products are altered or discontinued without prior notice (a reserved right), so if you are about to set your heart on a particular fireplace, please consult your retailer before making that final commitment.

Before committing to a fireplace, please discuss your particular installation with your retailer who will provide expert advice and carry out a survey.

For cleaning, maintenance and warranty details please visit www.pureglowltd.co.uk

Disclaimer: We reserve the right to change or withdraw details, prices or specifications without prior notice. Every effort has been made to ensure the accuracy of information in this brochure. All dimensions are given for your convenience and should only be used as a guide. Colour reproduction is as accurate as current printing methods allow. We cannot be held responsible for changes or matters outside our control.
